DETAILED ACTION

Claims 1-45 are pending in this application. Claims 1, 34, 35 and 40 are independent claims.

The present title of the invention is "Efficient Movement of Fragment Stamp". This action is non-final.

The Group Art Unit of the Examiner case is now 2676. Please use the proper Art Unit number to help us serve you better.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-33 and 40-45, drawn to the method of traversing pixels of a graphic object with a fragment stamp, classified in class 345, subclass 619.
 - II. Claims 34-39, drawn to positioning probe points, classified in class 345 subclass 582.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as traversing pixels of a graphic object with a fragment stamp. Invention II has separate utility such as positioning probe points. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
